

# ALUMNI PROFILE

## CHLOE LIDERTH

2015-17

*I have such amazing memories of my time at Carmel, from spending everyday with my best friends to realising the career path I wanted to follow. The help and support of the staff at Carmel helped me progress onto the next steps in life.*

I graduated from the University of Liverpool with a 1st class degree in Pharmacology. As part of my dissertation module as an undergraduate pharmacology student, I was involved in a laboratory research project focussing on resistance to chemotherapy drugs in leukaemia. I was also selected as one of few undergraduate students to receive a funded studentship to complete a laboratory-based project, focussing on colorectal cancer cell models and their relevance in drug research. Being fortunate enough to have first-hand experience in a world-renowned research environment sparked my interest in cancer research and led to my decision to continue my studies at the University of Liverpool.

I am currently an MRes (Masters of Research) student in Biomedical Sciences and Translational Medicine, with a specific focus on Molecular and Clinical Pharmacology. I hope to gain more laboratory research experience in the coming months, with the hope to potentially pursue this further and complete a PhD.

### SCHOOL

St Edmond  
Arrowsmith  
(Whiston)

### STUDIED AT CARMEL

Biology A  
Chemistry B  
English Lang & Lit B

### UNIVERSITY

Pharmacology  
Liverpool
