

ALUMNI PROFILE

ASHLEY TYRER

2011-13

I'll always remember my time at Carmel as an amazing experience of both academic and personal development, which provided the ideal transition from secondary school to University education.

I graduated with a First Class Honours degree in Neuroscience from the University of Edinburgh in 2016, during which time I was also awarded the Physiology Award for Most Distinguished Scholar, and Edinburgh Awards for Work Experience and Representing Students.

I was then accepted onto a Wellcome Trust PhD programme in Neural Dynamics at the University of Bristol. During my PhD I took on many representative roles such as Neural Dynamics and PGR Representative, and published manuscripts in high-impact journals. I also attended and presented my work at international conferences and summer schools in London, Zurich, Singapore, Japan and Rome.

I recently passed my thesis defence and have now completed my Doctoral degree, and at the start of September this year I started my new position as a Postdoctoral Research Fellow at Aarhus University, Denmark, at the Centre of Functionally Integrative Neuroscience.
