Higher Education

Financial Maths
Loughborough university

Studied at Carmel

Mathematics	A*
Further Maths	A*
Statistics	A*
Physics	A

High School

Rainford High

I studied maths, further maths, statistics and physics at Carmel College and thoroughly enjoyed my time at here. My teachers were really helpful and encouraging and always pushed me to do my best, which I am grateful for.

“I am now in my final year of study, having completed a placement year during the third year of my Financial Maths degree at Loughborough University. During my placement year, I worked as a global business analyst for the glass manufacturer, Pilkington, which is also known as NSG Group. By doing so, I have gained professional skills required for work places and have gained insight into what it would be like after graduation. I would recommend everyone to do a placement year, if they have the opportunity, so that they can gain relevant skills and an insight into their desired working sector.

We are all currently going through a difficult time, having to study online during this pandemic. To study efficiently in the same way you would study in school, I would recommend making a study timetable and follow it as if you were in school.”
