High School

De La Salle

I'll always look back fondly on my time at Carmel College. I'm extremely grateful for the academic support I received from tutors and the help I got in fine-tuning my Medicine application for university. My future career wouldn't have been possible without Carmel.

"I've recently passed my 3rd year of Medicine at the University of Liverpool. I have taken up the opportunity afforded to Medical students to take a year out partway through my degree, called 'Intercalating,' to focus on a special interest. I'm now studying for my Master's at the Liverpool School of Tropical Medicine, before planning to return to Medicine to complete my final two years of training to be a Doctor. I'm thoroughly enjoying my time at university and haven't looked back since Carmel. Learning 'on the job' while on placement in hospitals is both unique and truly rewarding. Since representing the Carmel College football team, I've continued this hobby into university life and now captain the University Medical School side, competing in national tournaments against other Universities. I want to specialise in Paediatrics to work at Alder Hey Hospital; although it seems a while off, I'm keen to start working in the NHS once I graduate."
