Class of 2013 Alumni

Higher Education

Neuroscience
Edinburgh

Studied at Carmel

Biology	A
Chemistry	A*
Maths	A*
Dance	A

High School

St Augustine's

I'll always remember my time at Carmel as an amazing experience of both academic and personal development, which provided the ideal transition from secondary school to University education.

"I graduated with a First Class Honours degree in Neuroscience from the University of Edinburgh in 2016, during which time I was also awarded the Physiology Award for Most Distinguished Scholar, and Edinburgh Awards for Work Experience and Representing Students.

I was then accepted onto a Wellcome Trust PhD Programme in Neural Dynamics at the University of Bristol. During my PhD I took on many representative roles such as Neural Dynamics and PGR Representative, and published manuscripts in high-impact journals. I also attended and presented my work at international conferences and summer schools in London, Zurich, Singapore, Japan and Rome.

I recently passed my thesis defence and have now completed my Doctoral degree, and at the start of September this year I started my new position as a Postdoctoral Research Fellow at Aarhus University, Denmark, at the Centre of Functionally Integrative Neuroscience."
