Studied at Carmel

Biology	A*
Chemistry	A
Mathematics	A*

High School

Liverpool Life
Sciences UTC

My journey at Carmel College has been a wonderful experience filled with myriad opportunities and excellent teacher support which has helped me fulfil my potential

“My first term at university has been a marvellous experience! The uni helped me settle in through freshers’ week by designing a plethora of fantastic fairs, ice breaker games and dinner nights out, allowing me the opportunity to make friends with many of my peers from my course.

Despite the Covid pandemic, Queen Mary University of London continues to provide multifarious enrichment activities and a seamless learning format, utilizing both online and in-person teaching to achieve an effective pedagogical approach.

I have enjoyed meeting lecturers, commencing modules, volunteering and joining various societies.

My enthusiasm and passion for dentistry continues to grow as the course progresses and I feel very grateful to be studying this course in such a great city.”
