## Chemical Engineering

### Class of 2019 Alumni

My time at Carmel was highly memorable. The staff cultivated a positive learning environment that ensured I was being continually challenged. This drive to see students succeed was one of the key reasons that I see, which has led me to where I am today. I am extremely grateful for the people I met at Carmel College.

"I graduated from the University of Cambridge in 2023 obtaining a First Class in both my Bachelors and Masters degrees ranking 11th in my year. I will begin a PhD in Chemical Engineering at the University of Cambridge beginning January 2024, researching sustainable ammonia synthesis by decoupling the production from fossil fuel emissions and utilising renewable energy!"
