

Zara Cowan

Veterinary Medicine

Class of 2019 Alumni

Carmel was really helpful when applying for Veterinary Medicine and helped me formulate the core of my personal statement and prepare for interviews. Carmel challenged me to get the grades that I needed and without the attention of teachers and the support of my peers I definitely wouldn't be where I am now.

“I am now in my 4th year studying Veterinary Medicine at the University of Nottingham and feel really ready to be a working, fully qualified vet! My life is 9-5 lectures, workshops and seminars with 2, 3 hour practicals a week! I also have cemented myself as a member of the Notts Vet community as I play netball matches with the our uni team once a week and am a part of Vets in the Community- a student led charity vet clinic ran each week. I am looking forward to starting my final year rotations in April where I will be taking part in the real deal. I hope to work as a Mixed animal vet back in the northwest after my graduation before taking on Australia and the world in the future!”
