

Megan Barlow

Trainee Actuary

Class of 2019 Alumni

I would recommend Carmel to anyone choosing a college. I had great teachers and I felt supported both academically and socially. There was always extra help when UCAS deadlines or uni interviews were coming up, and I felt well prepared to study at degree level.

"Over the summer I graduated from the University of Nottingham with a Masters in Mathematics, and I have recently started working as a Trainee Actuary for a firm called Isio in their Manchester office. My role involves both technical work and consulting, and allows me to study towards qualifying at the same time. It's a great balance for someone who wants to use maths and stats in practice but also might enjoy engaging with clients."
