

Poppy Fenn

Lab Technician

Class of 2020 Alumni

I am grateful to Carmel for all the amazing opportunities, enabling me to be where I am today. Support from staff was immense, creating a culture where I could seek advice if needed and my contributions were valued.

"As part of my degree, I completed my Institute of Biomedical Science registration portfolio and became a registered Biomedical Scientist with the Health and Care Professions Council, which I have maintained to date. At university, I was also awarded the Vice Chancellor's scholarship for showing a commitment to my community and a high level of academic performance.

I currently work as a Laboratory Technician on the Clinical Research Facility at the Royal Liverpool Hospital. I have recently been successful in becoming the LGBTQ+ network chair at the University Hospitals of Liverpool Group, a role I am enthusiastic to embrace to drive positive change and make meaningful impact for both staff and patients. My success at Carmel enabled me to develop invaluable skills which I continue to use today, opening various opportunities for personal and professional growth."

Higher Education
